

Name: Sentient Ultimate Big Chill

One-line Introduction: A sentient being who was once trapped inside the Ultimatrix as the Ultimate Big Chill transformation of Ben Tennyson.

Appearance: The Sentient Ultimate Big Chill looks identical to the Ultimate Big Chill form. The key differences are that he possesses red eyes and lacks the evolved Ultimatrix symbol on his chest.

History: The Sentient Ultimate Big Chill was trapped inside the Ultimatrix as Ultimate Big Chill. He, along with other Ultimates, attempted to convince Ben Tennyson to commit suicide in "The Ultimate Sacrifice" so they could be freed. Azmuth intervened, stopping Ben and freeing the Ultimates. Azmuth then took them to his lab so they could live comfortably and usefully.

Weaknesses: The Sentient Ultimate Big Chill's intangibility is ineffective against opponents who also possess intangibility, as it cancels out his ability. Like Necrofriggians, he is vulnerable to electricity, such as that generated by a Transylvian.

Powers and Abilities: The Sentient Ultimate Big Chill can breathe "ice flames," which are plasma beams that consume the heat of whatever they touch and can be controlled with precision. He can also shoot these ice flames from his hands. His breath and beams are stronger and colder than a regular Necrofriggian, capable of instantly freezing the surrounding air and enemies. He retains the Necrofriggian abilities of fast flight and intangibility and can turn fully invisible. He can freeze opponents and objects by phasing through them. The Sentient Ultimate Big Chill possesses enhanced strength and is durable enough to survive being smacked by a To'kustar. Like Necrofriggians, he can survive underwater and can make his surroundings snow. He has Plasmokinesis, Heat Absorption (via Ice Flames), Ice Flame Breath, Freezing Breath, Ice Constructs (via Heat Absorption), Intangibility, Invisibility, Cryo-Phasing, Flight, Foldable Wings, Enhanced Strength, Enhanced Durability, Enhanced Speed (via Flight), Enhanced Reflexes, Underwater Survivability, and Snowstorm Generation (via Heat Absorption).

Personality: Not mentioned.
