

Name: Lodestar

One-line Introduction: Lodestar is the Omnitrix's DNA sample of a Biotsavartian from the planet Maxwell.

Appearance: Lodestar has a magnetically floating metal head surrounded by a glowing white aura and levitates in an arch between his shoulders. He has crab-like claws for hands, similar to Brainstorm's. His body is mainly brownish-black with yellow feet, hands, shoulders, and chest, and is made of living alien metal. In *Heroes United*, the yellow parts of his body are slightly darker. In *Omniverse*, Lodestar has a yellow eyebrow-like crest on his forehead, similar to Jetray's. His head is more skull-shaped with lines beneath his mouth. The aura around his head is green, the yellow from his feet goes up to his thighs, his shoulders are larger, and the yellow stripes by his chest are shorter. Lodestar wears the original Omnitrix/Ultimatrix/Omnitrix symbol on his chest.

History: Lodestar was unlocked onscreen after the Omnitrix was reset in **War of the Worlds: Part 2**. His first appearance was in **Simple**, where he defeated the red troops and tried to reason with them. In **Busy Box**, Lodestar battled the Naljian Destructor but could not destroy it when Cosmic Mom arrived. In **Primus**, he fought and dismantled a red Techadon Robot but reverted before he could destroy it. In **Vendetta**, Lodestar battled Ragnarok until the latter escaped. He was briefly used by Vilgax's Bioids in **The Final Battle: Part 2**. In **Duped**, Lodestar defeated Sir Urien. In **Video Games**, he was defeated by the Stalker. In **Ultimate Aggregor**, Lodestar and the team defeated a group of Aggrebots, and he was destroyed when Aggregor's starship exploded, but he survived and regenerated. In **Absolute Power: Part 1**, Lodestar attacked Forever Knights to find out about Ultimate Kevin's location. In **Girl Trouble**, he battled Computron's minions. In **The Purge**, Lodestar fought and destroyed a mechanical dragon with Kevin's help. In **Ben 10/Generator Rex: Heroes United**, Lodestar battled Rex before switching into Rath. In **Night of the Living Nightmare**, he appeared twice in a dream. In **The More Things Change: Part 1**, Lodestar stopped Zombozo from stealing a brain. In **Return to Forever**, Lodestar battled the Forever Knights and saved Jimmy from them. In **A New Dawn**, Lodestar appeared briefly when Ben was cycling through his aliens. In the comics, he magnetised an alien ship in **One Man's Trash**, and in **Time Saver**, he attacked Vilgax. Lodestar is a playable alien in the game *Ben 10 Alien Force: The Rise of Hex* and is also a playable alien in the online game *Super Hero Time*.

Weaknesses: Lodestar's magnetic fields are useless against non-magnetic objects, such as road pavement, the Red Knight's throwing knives, and the Stalker. Additionally, Lodestar's magnetic fields can be absorbed and redirected by certain substances, such as the Shock Staff. Lodestar's head is a vulnerable target because it is not attached to his body, which can be exploited by grabbing it, throwing objects at it, or knocking it away with a magnetic field.

Powers and Abilities: Lodestar is magnetokinetic, able to control natural magnetic fields and generate his own. His fields can overload electrical circuits and attract magnetic materials. At full power, his magnetic pulse can affect machinery as far as half a mile. He can use electromagnetism to generate a force field and block solar energy attacks. Lodestar has telekinetic control over metal, allowing him to levitate and move it, which he can also use to levitate himself and fly for short distances. He can damage and destroy magnetic substances, converting his magnetic fields into kinetic energy. If destroyed, he can reconstitute by pulling his pieces back together with magnetism. Lodestar possesses enhanced strength and durability, and can survive in the vacuum of space. He can see objects using the electromagnetic spectrum and act as a compass.

Personality: Not mentioned.
