

Name: Eatle

One-line Introduction: Eatle is the Omnitrix's DNA sample of an Oryctini from the planet Coleop Terra.

Appearance: In Ultimate Alien, Eatle was a ten-foot-tall metallic humanoid alien, dark blue in color. His silver serrated mouth took up most of his upper body and back; the rest of his head was on top and could swivel from side to side. His head consisted of two eyes, a very tall horn in front, and a much shorter one in back. He also had a silver belt indented in his waist, matching wristbands and soles, and four claws on each hand. The inside of his mouth was green. In Omniverse, Eatle looks much more beetle-like, now having grey skin with dark green spiked armor running from his face down to his back, and also on his arms and legs. He now has an underbite, with his grey jaw being more rounded and toothy, and hinged to his face by two spikes. He has a blue tongue, and his longer and shorter horn now switch places, with the longer one having forks at the top, making it resemble that of a Japanese rhinoceros beetle. He now has two toes on his feet, and only three fingers on each hand. He wears green clothing over the parts of his torso left bare by his shell. Eatle wears the Ultimatrix/Omnitrix symbol on his chest.

History: Eatle first appeared in A Knight to Remember, where he tried to stop Vilgax from breaking the Seal but was instantly defeated by him. In Enemy of My Frenemy, Eatle defeated a water creature that Addwaitya had created. Later, Eatle tried to devour Charmcaster's machine before switching into Chromastone once he realized he could not eat the entire machine. In Catch a Falling Star, Eatle fought Captain Nemesis, but was defeated by a mentally unstable Jennifer Nocturne. In Night of the Living Nightmare, Eatle defeated a Ship-enhanced Julie in a dream. In The Ultimate Enemy: Part 1, Eatle battled Ultimate Vilgax with the help of Sir George before eventually switching into Humungousaur when Vilgax started gaining the upper hand. In Hot Stretch, Eatle chased after Ester in Undertown and retrieved a Nuclear Fusion Device from her only to lose it to the Kraaho. In Store 23, Eatle briefly flew through the air due to being launched by Liam's cart of Vaxasaurian eggs before reverting. In Return to Forever, Eatle tried to break out of a force field, but was reverted by the Forever Knights' DNA Scanner. In OTTO Motives, Eatle briefly fought a giant OTTO. In Let's Do the Time War Again, Eatle ate part of the wrecked Tenn-Speed offscreen before being picked up by Rook. In A New Dawn, Eatle appeared for a short time when Ben was cycling through his aliens. Eatle is a playable alien in the game Ben 10: Omniverse 2 (only on 3DS).

Weaknesses: Eatle has uncontrollable hunger and may unaccountably try to eat something against his interests, such as the remains of the Tenn-Speed. Being an Oryctini, Eatle is weak against his natural predator.

Powers and Abilities: Eatle has the ability to eat just about anything and then convert the materials' matter into energy to shoot a green laser beam out of the slot on his horn. The beam is powerful enough to cut a floating mountain of Legerdomain in half and even hold down a Lucubra-enhanced Vilgax. Eatle's jaws are very strong and can be used to chew up various resilient materials, like metal. Eatle has enhanced strength, as he was able to crush Captain Nemesis's glove, grab a Ship-enhanced Julie before pushing her through several walls of her house without stopping, and rip off the bumper of Kevin's car. Eatle has enhanced durability, as seen when he was able to withstand Captain Nemesis's glove's laser, which was able to injure a Chronosapien and kill a human with a single shot, as well as an entire building from Dagon's dimension falling on top of him. Eatle can run very fast, and in addition to shooting lasers, his horn can also be used as a very effective battering ram; both of these feats were shown during his fight with Vilgax. Eatle can scale up walls, as shown when he clambered up the Sorcerer's Engine.

Personality: Not mentioned.
