

Name: Ampfibian

One-line Introduction: Ampfibian is the Omnitrix's DNA sample of an Amperi from the planet Tesslos in the Andromeda Galaxy.

Appearance: Ampfibian is a blue jellyfish-like alien characterized by white swipes on his body that resemble lightning streaks. His main body features three-segmented skirt-like parts that form his head, chest, and abdomen. He possesses six long tentacles which function as two pairs of arms and a pair of legs. In Ultimate Alien, Ampfibian had pupil-less eyes and the Ultimatrix symbol was located on his chest. His eyes were initially blue in the episode "Fused" due to being fused with Ra'ad, but they were changed to green for subsequent appearances. In Heroes United, Ampfibian's appearance was mostly consistent with Ultimate Alien, though most of the white swipes were missing or altered. In Omniverse, Ampfibian's design was altered with changes to the lightning streak swipes on his body. His tentacles are pointed instead of curved, and his green eyes are larger with more prominent black outlining. He wears the Omnitrix symbol on his mouth.

History: Ampfibian first appeared in "Fused," when his DNA was sampled and entered the Codon Stream after the Ultimatrix scanned Ra'ad's DNA. Ben remained stuck as Ampfibian until Kevin reset the Ultimatrix. In "Deep," Ampfibian swam to Pisciss' core with his team and Pyke. In "Viktor: The Spoils," an unconscious Ampfibian's telepathic abilities were forcibly used to put King Xarion's mind in Dr. Viktor's body. In "Ben 10/Generator Rex: Heroes United," Ampfibian was shown as one of Ben's aliens. In "Inspector #13," Kevin as Ampfibian battled incomplete Techadon Robots. In "Night of the Living Nightmare," Ampfibian defeated Ultimate Kevin in a dream. In "Have I Got a Deal for You," Ampfibian electrocuted Pax, Blarney T. Hokestar, fought Solid Plugg, and saved the Screegit. In "Special Delivery," Ampfibian defeated Seebik and the Kraaho. In "Rad," Ampfibian caught Pax. In "Max's Monster," Ampfibian was defeated by Phil. In "Return to Forever," Ampfibian tried to fight the Forever Knights but was reverted by their DNA Scanner. In "The Rooters of All Evil," Ampfibian was defeated by Swift. In "A New Dawn," Ampfibian appeared briefly when Ben was cycling through his aliens. Ampfibian is one of the Andromeda Galaxy aliens playable in the game Ben 10 Ultimate Alien: Cosmic Destruction and is vital for progression on The Great Wall and The Amazon levels and the default optional alien for the Eiffel Tower level. Ampfibian is also a playable alien racer in Ben 10: Galactic Racing. Ampfibian is one of the aliens used by Ben as a special attack in Punch Time Explosion and XL.

Weaknesses: Ampfibian is vulnerable to enemies that can drain electricity, such as Phil. His electric attacks are ineffective against Solid Plugg because he is made of super dense rubber. He can be harmed by an Aerophibian's neuroshock blasts. Despite being able to use his electricity underwater, Ampfibian can accidentally shock himself if he is entering or partially in water. His intangibility is useless against other beings that can also become intangible, as it will cancel out their abilities to do so. Ampfibian cannot survive in the vacuum of space.

Powers and Abilities: Ampfibian can manipulate and produce electricity to stun, paralyze, or kill. He can absorb electrical energy, such as lightning and the Pisciss Volann guards' energy nets, and redirect it through his tentacles. He can use electrokinesis to telekinetically move objects. Ampfibian can generate a protective force field around himself. Similar to Upgrade and Buzzshock, he can become pure energy to enter electrical cables and control technology, as well as generate a large energy blast. Ampfibian can make himself intangible, electrically shocking objects and beings he phases through. He can fly and is agile while flying. His tentacles can extend multiple times their length. Ampfibian has enhanced strength, enough to restrain Phil with his tentacles. Due to being boneless, he can squeeze through small spaces. He is durable enough to withstand being thrown against a wall by Solid Plugg and getting hit by an Aerophibian's neuroshock blasts. Ampfibian can breathe underwater, swim at superhuman speeds, and safely produce and discharge electricity underwater. He can read the thoughts of other life forms by sensing the electrical pulses of their minds.

Personality: Not mentioned.
