

Name: Spidermonkey

One-line Introduction: Spidermonkey is the Omnitrix's DNA sample of an Arachnachimp from the planet Aranhascimmia.

Appearance: Spidermonkey is a small monkey-like alien with four arms, two legs, three fingers on each hand and three toes on each foot, blue fur over a dark blue center, and a tail with two stripes near the tip. In Alien Force and Ultimate Alien, Spidermonkey had two pairs of green eyes (making a total of four), and he wore the Omnitrix/Ultimatrix symbol on his chest. In Heroes United, Spidermonkey looked mostly the same except his eyes were completely black like a spider, although he retained the green pupils, and the shape of the fur surrounding the bottom of his face is also slightly different. In Omniverse, Spidermonkey has three pairs of green eyes (making a total of six), opposable toes, his hair is flipped up, the two stripes on his tail have turned white, and the fur on his head is spiky with white stripes. His nose has now shifted to his forehead and its shape has changed. The Omnitrix symbol on his chest is now connected to two green sashes worn across his chest. The Naljian Destructor as Spidermonkey looked like Ben's Spidermonkey in Alien Force and Ultimate Alien, but with glowing light green eyes and a glowing Omnitrix symbol. Negative Spidermonkey in Good Copy, Bad Copy, looked exactly like Ben's Spidermonkey. In The Final Battle: Part 1, Negative Spidermonkey's eyes and Ultimatrix symbol were recolored red. In Omniverse, Negative Spidermonkey looks mostly the same as Ben's Spidermonkey except his fur is recolored black, his skin is recolored greyish, the stripes in his hair and on his tail are recolored light grey, and his eyes, sashes, and Ultimatrix symbol are recolored red.

**Weaknesses:** Spidermonkey can get tangled by his own webs, and enemies can easily use his webs to their advantage. Spidermonkey's webs can be frozen and made brittle by the ice breath of a Polar Manzardill, and they can also be dissolved by heat generated by a Crystalsapien. Being an Arachnachimp, Spidermonkey is a target to all the predatory species of Aranhascimmia, such as Root Sharks. Spidermonkey is vulnerable to electricity, and can be rendered unconscious if hit by a sedative quill from a member of Argit's species. Spidermonkey is vulnerable to toxic gases.

**Powers and Abilities:** Spidermonkey has the ability to expel webbing using a silk as strong as steel cable from his tail, at a distance of over 20 feet. His webbing is very sticky, meaning he can use it to trap opponents or blind them by shooting webbing in their face, but it does not stick to him due to a special oil in his fur. Spidermonkey can also shape his webs into slings to swing across vast distances. Spidermonkey uses a sound-based radar system for aiming and firing his webbing. Spidermonkey can use his webbing to create web constructs, such as a web slingshot, and a web net. Spidermonkey has enhanced strength, as he was capable of using a lamp post to hit Ultimate Kevin up a few feet, carry Queen Voratia Rumbletum over his back, and carry No Watch Ben while web-slinging without any difficulty. Spidermonkey is very durable considering his size, as shown when he was able to survive seemingly unharmed after several large pieces of concrete fell on him. Spidermonkey can jump high in the air and has enhanced reflexes, as shown when he avoided Thunderpig's energy flail. Spidermonkey has enhanced agility and enhanced acrobatic skills. Spidermonkey has hearing superior to a human's, as Simian could hear Gwen and Kevin talking about him from several feet away. Spidermonkey's fingers can stick to and be used to scale vertical surfaces like a spider. Spidermonkey's feet and tail are both prehensile, enabling him to hold and carry multiple objects as if they are extra hands. Spidermonkey can assume a bipedal stance for short periods of time, as shown when he stood on two legs after hitting Ultimate Kevin.

**Personality:** Spidermonkey has a wisecracking personality, making random jokes during the course of battle.
