

Name: Wildvine

One-line Introduction: Wildvine is the Omnitrix's DNA sample of a Florauna from the planet Flors Verdance.

Appearance: Wildvine is a humanoid plant with one eye in the middle of his face, five vine-like legs, four long fingers on his hands, flytrap-shaped flaps with teeth covering his head, and fruits on his back that he can use as explosives or smoke bombs. In the Original Series, Wildvine had green skin, green teeth, five legs, the eye on his head was blue, and he had secondary eyes of the same color on each of his shoulders. In Back With a Vengeance, Wildvine wore a yellow raincoat. In the Ultimate Alien intro, Wildvine looked mostly the same as before, except his skin was recolored brownish-green, his flytrap teeth were recolored black, and his eyes and Ultimatrix symbol were all recolored green. In Omniverse, Wildvine regains the green skin color from the Original Series, he now has only four legs, his teeth were recolored white, and his fingers are much shorter and thicker. The secondary eyes on his shoulders are replaced with patches of light green similar to those on his hands. He also now has a blue tongue, his teeth are neater and his chin and flytrap teeth are bigger. 16-year-old Wildvine wears the Omnitrix symbol on a green and white belt. In Breakpoint, 16-year-old Wildvine wore two red and white wristbands on his wrists, a white sweatband on his forehead, a white gym towel around his neck, and a larger tan belt over his Omnitrix belt. 11-year-old Ben as Wildvine in Omniverse looks the same as his 16-year-old self, but wears the original Omnitrix symbol (which has been recolored green) on his chest to reflect his original appearance. Ken's Wildvine looked the same as 10-year-old Wildvine in the Original Series. Negative Wildvine looks just like 16-year-old Wildvine in Omniverse, but is greenish-brown with a red eye and his flytrap teeth are black. Negative Wildvine wears a red and white belt with a red Ultimatrix symbol on it. Gwen 10 as Wildvine looks similar to her male counterpart, but her body is shaped like a dress. Her fly trap is much larger, and she has bulb-like hair with a ponytail, along with dark green lips. She has a skirt-like structure on her waist which covers the top of her leg tendrils. She lacks the spikes that Ben's Wildvine has on his arms, legs, and chest and she has one glowing pink eye. She wears the Omnitrix symbol, which is the same color as her eye, on her stomach.

History: Myaxx added Wildvine's DNA to the Omnitrix, unaware that the Florauna donor was possessed by Zs'Skayr.
