

Name: Ultimate Wildmutt

One-line Introduction: Ultimate Wildmutt is the Ultimatrix's artificially evolved DNA sample of a Vulpimancer.

Appearance: Ultimate Wildmutt is significantly larger and more muscular than Wildmutt. His fur is a maroon-red color, and he has four huge gray/white spikes running down his back that overlap. These spikes start out as a shark-like fin at the head and rise almost into an arc over the back, tapering near the rump. He also has a long tail with a curved horned tip, resembling a scorpion stinger. His lips are black, like Wildmutt in the original series, and he has white claws. Ultimate Wildmutt wears the evolved Ultimatrix symbol on his chest.

History: Ultimate Wildmutt first appeared in "Prisoner Number 775 is Missing", where he defeated Prisoner 775. In "The Ultimate Enemy: Part 2", Ultimate Wildmutt defeated the Esoterica. He was included in the script outline for an early version of the second episode for Omniverse, "Tangled Web: Part 2." The Omniverse crew did not discuss bringing Ultimate Wildmutt back as one of Albedo's transformations. Ultimate Wildmutt's sentient counterpart did not appear in "The Ultimate Sacrifice," even though the synopsis said that all of the Sentient Ultimate Forms want freedom. Ultimate Wildmutt was first hinted on the DVD cover of \*Ben 10 Ultimate Alien: The Wild Truth\*. Ultimate Wildmutt was originally intended to be the size of a chihuahua and was incapable of speaking human languages. One of Ultimate Wildmutt's unused concept art by Jon Suzuki would later be repurposed as the basis for Solid Plugg's design.

Weaknesses: Not mentioned.

Powers and Abilities: Ultimate Wildmutt has the ability to speak other languages than the Vulpimancer language. He retains Wildmutt's incredible senses of smell and hearing. Ultimate Wildmutt has sharp claws and teeth, which can be used for close-range combat. He also has a scorpion-like tail with a sharp tip. Ultimate Wildmutt possesses enhanced strength, as he was easily able to hold down Prisoner 775.

Personality: Not mentioned.
